

<p>The question posed is open-ended.</p>	<p>The task is less structured than a traditional mathematics question.</p>
<p>The task involves multiple steps in order to find a solution.</p>	<p>A range of different methods could be used to get the answer.</p>
<p>The task has multiple solutions.</p>	<p>There is a lack of detail in the presentation of the question.</p>
<p>Students have to make assumptions before they can start or complete the task.</p>	<p>Students have to pose their own questions at the beginning or during the task.</p>
<p>Students need to develop their own strategies rather than follow routine processes.</p>	<p>Students have to make decisions on the direction of the task during the process of finding a solution.</p>
<p>The task involves a chain of Reasoning.</p>	<p>The question is set in a scenario or context and requires interpretation.</p>
